

Office Use ID # _____

Application for Architectural Committee Inspection of Planned Installation of A Satellite or HDTV Dish

Name (please print) _____ Lot _____ Subdivision _____

Address: _____ Sun City ___ Peoria _____ Phone () - _____

In June 2002, the Board of Directors for Ventana Lakes Property Owners adopted an Antenna Resolution/Policy which stated: The installation is to be made where it is **not visible** from the street or neighboring property, providing an acceptable signal will be received. The Resolution/Policy was adopted to regulate the installation, use and maintenance of satellite dishes that are governed by rules established by the Federal Communication Commission

Members of the Architectural Committee are available to meet with homeowners prior to the installation to discuss possible sites for the dish placement.

Installer concerns regarding an installation site should be brought to the Architectural Committee prior to installation.

If the dish is not located where is not visible from the street or neighbors, and without knowledge of the Architectural Committee, the owner may be requested to relocate the dish which may be an additional expense to the homeowner from the installer.

Property Owner's signature _____ Date submitted _____
